EDUCATION

Syracuse University, College of Engineering and Computer Science

Graduated May 2023

Bachelor of Science: Computer Engineering

SKILLS AND COURSEWORK

Technical Skills: Java, Javascript/CSS/HTML, Python, C++, C, Kotlin

Databases: Firebase, MySQL

Related Courses: Data Structures, Object-Oriented Design & Programming, Operating Systems, Embedded & Mobile Systems Programming, Android Programming, Machine Learning, Software Specification and Design

Organizations: National Society of Black Engineers, ColorStack, Chicago Scholars

PROJECTS

Cycle Sense, (Python/C++, Github), Embedded Senior Design Project: Capstone Finalist **August 2022 – May 2023**

- Designed and constructed an IoT device that can recognize and interpret bicyclists hand signals using OpenCV and advanced Image Processing techniques aimed to reduce roadside incidents with motor vehicles and cyclists
- Successfully implemented the i2c and serial communication protocols between the Main PC, Arduino Uno Rev3, and Raspberry Pi 4B to seamlessly exchange data between each hardware component
- Engineered a synchronized state system on the Raspberry Pi ecosystem between the 3 output indicators to react based on the specific data byte received on the Raspberry Pi

FindMyProfessor, (Java, Firebase, Github), Android Mobile Application **September 2022 – January 2023**

- Co-lead developer on a team of four that created an android mobile application that serves as a tool for engineering students to streamline identifying and connecting with professors offering courses that align with their academic pursuits
- Developed the Sign Up/ Login user authentication of clients, leveraging Firebase Authentication to ensure a secure and user-friendly entry point into the application
- Implemented a forgot password recovery mechanism that allows clients to reset access to their credentials conveniently by sending a reset link to the clients email stored on the database
- Engineered an intent wrapper that prompts the email app on the android system to open for the client to easily engage with professors listed in the application

Meeting Maker, (Kotlin, Firebase, Github), Android Mobile Application **September 2022 – January 2023**

- Co-lead developer on a project that developed an android mobile application designed to streamline and optimize daily planning and meetings for students and professors
- Designed and implemented the functionality for meetings created by utilizing the Firebase Database to store vital meeting information
- Implemented an intent wrapper that prompts the user to engage with their GPS navigation application on their device for directions to their next meeting

LEADERSHIP EXPERIENCE

Supervisor, Syracuse University Tennity Ice Pavilion

August 2019 – July 2023

- Managed and trained 8-10 employees which increased customer service productivity by 15%
- Operator of the ice re-surfacer machine used to clean and resurface the ice sheet used by hundreds of people daily
- Open and closed the ice rink facility

AWARDS

William Peil Award, Issued by Syracuse University Engineering and Computer Science School

April 2023

- Placed 1st out of 20 teams in Syracuse University's annual Open House competition by developing an IoT device that decreases roadside incidents with motor vehicles and cyclists by recognizing and interpreting cyclist hand signals
